PROFESSIONAL SUMMARY

Motivated **M.Sc. Physics graduate (2025)** transitioning into software development with a specialization in **Python Full Stack Development**. Proficient in building scalable back-end systems using **Django** and **Flask**, complemented by responsive front-end design. Adept at database management with **MySQL** and passionate about applying analytical problem-solving skills to build efficient, user-centric web applications.

TECHNICAL SKILLS

- Languages:** Python (Django, Flask), Java, JavaScript (ES6+)
- Web Technologies:** HTML5, CSS3, Tailwind CSS, Bootstrap
- Database:** MySQL (Relational Schema Design, CRUD Operations)
- Tools & Version Control:** VS Code, Git, GitHub
- Soft Skills:** Analytical Thinking, Logical Reasoning, Adaptability, Quick Learner

PROJECTS

School Management System

(Python, Flask, MySQL)

- Developed a full-stack web application to digitize academic record-keeping.
- Built a relational **MySQL** database with linked tables for students, grades, and attendance.
- Implemented **Flask** routes to handle CRUD functionalities (Create, Read, Update, Delete) for student data.
- Designed a dynamic front-end using Jinja2 templates and CSS for a streamlined administrative dashboard.

Bank Management System

(Java, JDBC, MySQL)

- Created a desktop-based banking application focused on secure transaction logic and account management.
- Used **JDBC** to establish a robust connection between the Java application and a MySQL backend.
- Applied advanced logic to handle interest calculations and balance updates, showcasing strong mathematical foundations.

EDUCATION

- M.Sc. Physics** | Sadakathullah Appa College, Tirunelveli | **2025**
- B.Sc. Physics** | Sarah Tucker College, Tirunelveli | **2023**
